

PRODUCT HIGHLIGHT

Edition - 1

YOUR SHOWER STYLIST

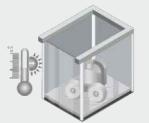

We are a new-age leader in aluminium shower enclosure systems, redefining modern bath spaces with innovation, precision, and elegance.

At Viera, we combine advanced metalworking expertise with refined aesthetics to create high-performance solutions for contemporary interiors. Our product range includes premium aluminium shower enclosures, designed to offer seamless functionality, durability, and a sophisticated look.

Each Viera product is engineered with meticulous attention to detail—ensuring long-lasting performance, effortless installation, and a design that elevates the beauty of every bathroom. Driven by innovation and backed by cutting-edge technology, Viera stands at the forefront of a new era in architectural aluminium systems. Our focus on quality, functionality, and design excellence enables us to meet the evolving needs of both residential and commercial spaces.

As a rising brand built on passion and craftsmanship, Viera is committed to setting new benchmarks in aluminium shower enclosure systems—offering the perfect balance of style, strength, and simplicity.

LABORATORY

WET AND DRY CYCLING TEST

Testing method: Place a minimum of 3 test specimens ($100 \pm 2\text{mm}$ square) vertically into 2L water with a temperature of $(85 \pm 1)^\circ\text{C}$ completely for (8 ± 0.25) hours, then remove the specimens from water, then place the test specimens for drying into an oven for (16 ± 0.5) hours.

Repeat this cycle 20 times using the same test specimens, then verify and record any adverse changes in appearance (blisters, crazing, cracks etc.) by visual examination and by the presence of traces of eosine, ignoring the 3mm width along each side to exclude any influence caused by the cut edge.

ENDURANCE TEST FOR SWING DOOR

Install the shower enclosure in accordance with the manufacturer's installation instructions.
Fix, at the opening edge of the door on a stable point, a means of automatically opening and closing the door. Ensure a steady velocity of (15 ± 5) cycles/min can be maintained with the door being opened/closed over a distance of $(70 \pm 10)\%$ of the opening range of the door.
Subject the door to 20,000 opening / closing cycles.
On completion of test check that the door still functions correctly.

ENDURANCE TEST FOR SLIDING DOOR

Install the shower enclosure in accordance with the manufacturer's installation instructions.
Fix, at the opening edge of the door on a stable point, a means of automatically opening and closing the door. Ensure a steady velocity of (15 ± 5) cycles/min can be maintained with the door being opened/closed over a distance of $(70 \pm 10)\%$ of the opening range of the door.
Subject the door to 20,000 opening / closing cycles.
On completion of test check that the door still functions correctly.

CORROSION RESISTANCE TEST

Compliance with the neutral salt spray(NSS) test e.g. as specified in EN ISO 9227 corrosion test in artificial atmospheres - salt spray tests with a minimum exposure time of 200 hours; the defect surface area A is less than or equal to 0.1% ($A \leq 0.1\%$). The defects do not exceed a dimension of 0.3mm.

STABILITY TEST

Impact the product twice with $(45 \pm 0.1)\text{kg}$ impactor at the testing position from inside, and check for any functional deterioration which could result in injury to the user.

The advantages of electro-coating aluminium are

- Durable even in harsh environment.
- Smooth and delicate appearance, gorgeous looking.
- Hard and tough coating with good abrasion resistance and corrosion resistance.

Comparison in manufacture processes between aluminium and normal aluminium

- The electro-coating aluminium coated with anodizing layer and then covered by electrophoretic paint.
- The normal aluminium coated with anodizing layer only.

Summarize

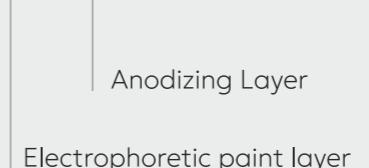

- The electro-coating aluminium has multiple protection coatings while the normal aluminium only has one.

Electro - coating Aluminium

No magnetism, light, insulating, High and low temperature resistant, Anti-dust, anti-fingerprint, wear-resistant, Easy to clean, anti-corrosion, Fully recyclable and good for decorating.

VAPOR[®] SERIES

VAPOR Series — The Essence of Pure Design The VAPOR Series by Viera brings a new dimension of sophistication to swing shower enclosures. Engineered with a hinge-free door system, this collection embodies the beauty of simplicity and the strength of intelligent design. Crafted from premium aluminium profiles, every VAPOR enclosure delivers exceptional durability, smooth operation, and a clean, seamless aesthetic.

The hinge-free mechanism ensures effortless movement and a minimal visual profile — enhancing the elegance of modern bath spaces while maintaining unmatched functionality.

Available in nine distinct designs, the VAPOR Series offers a wide range of configurations to complement every interior concept — from compact bathrooms to expansive, luxurious walk-in showers. Each design captures the essence of Viera's philosophy: merging innovation with refined craftsmanship to create timeless spaces. With the VAPOR Series, Viera transforms the ordinary into the extraordinary — where freedom of movement, purity of form, and precision engineering come together to define the next generation of shower enclosures.

MYST[®] SERIES

The Art of Smooth Living The MYST Series by Viera redefines the sliding shower enclosure with a perfect blend of elegance, innovation, and precision engineering. Designed for modern spaces, it offers seamless movement, sleek aesthetics, and superior functionality — transforming everyday bathing into an experience of effortless luxury.

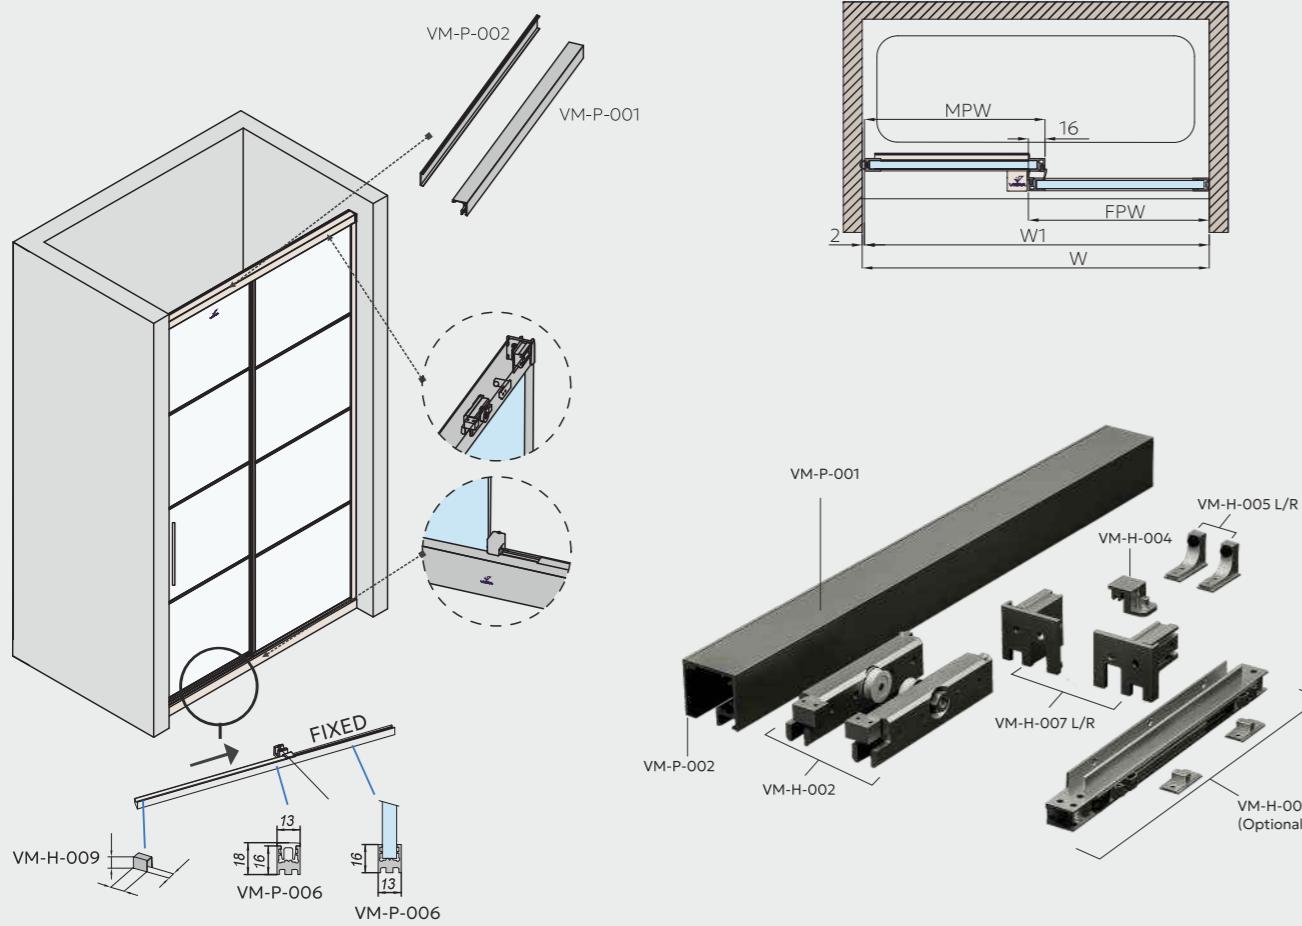

Each enclosure in the MYST Series is crafted from premium-grade aluminium, ensuring lasting strength, corrosion resistance, and refined detailing. The smooth sliding mechanism is engineered for silent, fluid motion, reflecting Viera's commitment to design perfection and user comfort.

Available in six distinctive models, the MYST Series provides versatile design options — from minimalist frameless styles to refined framed configurations — allowing architects, designers, and homeowners to create spaces that perfectly match their vision and layout. With Viera's MYST Series, functionality meets sophistication — where every slide speaks of quality, and every detail defines modern luxury.
